SUMMARY

With 3 years of experience specializing in front-end development of scalable, high-performance web applications. Proficient in modern front-end technologies and Agile methodologies. Experienced in collaborating with cross-functional teams to deliver high-quality applications through rigorous testing and continuous improvement. Passionate about solving complex technical challenges and contributing to the success of projects by creating intuitive, responsive, and engaging user interfaces.

TECHNICAL SKILLS

Technologies/Framework : HTML5,CSS3,JavaScript,React JS,Bootstrap

Developer Tools: Vs-code,canva,GIT

Languages: MySql

EXPERIENCE

Hanuma Infotech

(oct 2021– Now)

Software Engineer | Responsibilities:

Developed responsive web applications by leveraging HTML5, CSS3, JavaScript, React.js, and Bootstrap, ensuring seamless user experiences across various devices and screen sizes.

Created reusable React components and optimized state management application performance and maintainability.

Collaborated closely with UI/UX design teams to translate wire-frames and visual designs into functional, intuitive web interfaces, focusing on user-centered design principles.

Version-controlled code using Git, ensuring a collaborative work flow with peers through Git Hub for effective code reviews and seamless integration.

Ensured cross-browser compatibility and high performance by identifying and fixing compatibility issues, optimizing loading times, and performing continuous testing to maintain a smooth user experience.

Designed engaging visual assets using Canva to enhance the aesthetic appeal and consistency of web pages.

Debugged and tested applications rigorously across multiple devices and browsers, troubleshooting issues to maintain flawless functionality and meet user expectations.
